

# My T.G Experience

## By Georgia Heath

### Introduction

In my very short time at T.G. I have had so much fun. I have never before been made to feel so welcome as I did when I first started at this school.

### First Memories

One of my first memories at TG was when Alice welcomed me at the door and showed me to my seat and welcomed me in the best way possible. Another one of my first memories was my first science experiment at TG which was where we made blood, which looked realistic. Another memory was my first time at forest school with the Year 6s as we had lots of treats, painted on wood circles and we built dens too.

### Funny Moments

When it comes to funny moments there are lots because my friends make me laugh everyday but some of the funniest moments have to be playing football at lunch time everyone laughing and jumping around and generally having a blast. And of course, P.E, and on my very first P.E sessions we were playing football and I tripped over and did a world record funny landing - it was hilarious.

### My Friends

I have made lots of friendships in the time that I have had here both boys and girls and even with some of the children in Receptions, Class 2 and Class 3.

### Conclusion

I have loved my short time at TG I have had so much fun. If I could sum up TG in three words they would be: **fun**, **enjoyable** and **lively**. I would like to thank all the teachers and pupils in this school for helping me when I first joined.
