

## My years in TG

This school has been my home for seven years filled with hilarious and memorable times. I have grown up with these year 6s and have watched them change throughout the years. No matter where high school takes them in life, I will always remember the amazing times we have had together. Here are some of my let's say amusing times.

### Funny memories

In class 2, in forest school, I was playing with Carlze in the field and she said go over to the bottom of the hill and turn around because some unicorns are going to eat this food (which was mud). But I didn't turn around and I watched Carlze throw the food over the fence and then proceeded to say the unicorns ate it. We had an argument for a week only to make up after she asked me for a pencil. Another is when I cried when I saw who was going to be my buddy (they were pretty unlucky getting me) but they helped me get through that year better than anyone.

### Happiest Memories

I know this is very recent, but my happiest memory is doing the yr6 silly photos. At that point I felt at home with them and of course it was hilarious to see the different faces made. Also right up there is when the whole class played tag and nobody knew who was it.

Overall, my time in TG has been to die for and if I could I would happily redo it all but sadly life goes on. Although we are leaving, that doesn't mean the memories leave as well. Many people have said these have been the best years of their lives but for me it's been my life. I hope that everyone will keep my strange legacy going. As one final note, I give hope to the Yr5s just in case they can't survive without us.

P.S I will miss your smile Lexi it brights up my day.

Goodbye TG

Harriqt
