

## It's Class 2 topic homework time!

This homework is due on 26th June. As you have been learning about The Wright Brothers I thought you would enjoy making a model / art work of the 'Wright Flyer 1'. This is the plane that the brother designed, built and flew their famous 12 second flight at Kitty Hawk (North Carolina) on 17th December 1903. There are some pictures of it below.

You might like to use junk modelling to create your aeroplane, or you could make your model from Lego and send in a photograph. You might like to create a technical drawing of the plane (like the one on this page) or you could make a more artistic artwork. You can let your imagination run wild!

For Year 2 pupils, I would also like you to write an explanation of the materials used in your creation and how you made it.

This is a really fun home learning project and I really look forward to seeing your creations in a couple of weeks time.

Thank you.
