

Dear parents

In the light of the advice that we are receiving, we are taking steps to increase the precautions we have in place to prevent the spread of infections. As we have already shared with you all classes have been learning about the importance of handwashing and all staff are being vigilant in encouraging children to do so at key points in the day e.g. before eating and after using the toilets.

It has been recommended that we put in place measures to minimise the sharing of equipment between children. Starting from today we will make sure that all children have their own individually named pencils, pens rulers etc and we will be talking with them about the importance of only using their own stationery items.

It would really help if all children in Classes 2, 3 and 4 could have their own set of named colouring pencils in school (we know that many already do) as we do not have enough resources to supply individual sets.

We recognise that this is not practical for Class 1 and we will be implementing more frequent hand washing during the day and regularly sterilising their shared resources.
