

## What it means to be a pupil at TG harry

My time at TG has been one long and exciting journey that I have thoroughly enjoyed from day one, when I was welcomed into school by Mrs Hendry and Mrs Beysens, right until today. Over my seven years in this fabulous school I have acquired many unique memories that I believe I could not of got at many other schools: memories like the Christmas play and going to the Royal Shakespeare Theatre to see Boy in The Dress. Another great thing about this school is that in year 6 we take up the responsibility of jobs which are actually very fun and I enjoyed all of them.

Here at TG we play lots of sport, all of which I have greatly enjoyed. Some of my favourite days here at TG have been the sporting days and I have even progressed to being athletics' captain. I really enjoy my sport and I hope to carry on with all my sports as I go to high school. I have always loved nature but being part of this school really enhances this passion through forest school were I have loved building dens, like my standing up iron man and multiple treehouses. One of my favourite dens was the tepee that myself Charlie, Jonas and Aaron C made: it might possibly be the biggest den I have ever built. Unfortunately, we ran out of time and could not finish it. Thank you for anyone who contributed to allow forest school to continue running - I have loved all of it.

This school has prepared me for my near-future challenges as well as my aspirations of being a park ranger and wildlife vet brilliantly. I could not think higher of this school and the wonderful teachers who work here. The things I shall miss most are the friendships I have made as well as the feel of the TG family. As I come to the end of my time here, so do the Francioni family. All three of us children in my family have said that this school is one very special place.
